Block-1 Aptitude

1) Initial prize = ₹400
selling prize = ₹480

$100\% = 400$

$x\% = 480$

$\frac{100}{x} = \frac{\cancel{400}^{5}}{\cancel{480}_{6}}$

$600 = 5x$

$x = \frac{\cancel{600}^{120}}{\cancel{5}_{6}}$

profit = 120 − 100
= 20%

2) Buy → ₹1500
Sell → ₹1200

$100\% = 1500$

$x\% = 1200$

$\frac{100}{x} = \frac{\cancel{1500}^{5}}{\cancel{1200}_{4}}$

$400 = 5x$

$\frac{\cancel{400}^{80}}{\cancel{5}} = x$

$x = 80\%$

Loss = 100 − 80
= 20%

3) Given

Product 20% above the cost prize, gives 10% discount

assum prize = 100

increase = 20%

= 100 + 20

Discount = 120 − 10%

= 120 − 12

Selling prize = 108

Profit = CP − SP

= 100 − 108

$= \frac{8}{100} \times 100$

profit = 8%

4) cp of 5 pen is ₹100

sp of each pen 25% profit

cp 1 pen = $\frac{100}{5}$ 20

cp of 1 pen = 20

1 pen profit = $\frac{25}{100} \times 100$ = ₹5

5 pen profit = 5 × 5

= ₹25

5) Selling prize = ₹900

loss = 10%

100% = 900

Loss : 100 − 10

SP = 90%

SP = 90% of CP

$900 = \frac{90}{100} \times x$

$900 \times \frac{10}{9} = x$

$100 \times 10 = x$

$1000 = x$

cost prize = 1000
