Block - 1 Aptitude

1) Ratio of A:B is 3:5 and B:C is 2:3 find A:C

$A:B = 3:5 \times 2 = 6:10$

$B:C = 2:3 \times 5 = 10:15$

$A:B:C = 6:10:15$

$A = 6$, $B = 15$

$A:C = 6:15 = 2:5$

② Divide ₹ 1000 in 2:3:5

Total ratio = $2+3+5$

$= 10$

1 part $= \frac{100\cancel{0}}{1\cancel{0}} = 100$

2 part $= 2 \times 100 = 200$

3 part $= 3 \times 100 = 300$

5 part $= 5 \times 100 = 500$

③ Ratio of boys : girls = 3:2

Total student = 50

1 part $= \frac{\overset{10}{\cancel{50}}}{\cancel{5}} = 10$

girls 2 part $= 2 \times 10$

$= 20$ girls

④ 4 pens = ₹40

1 part = $\frac{\cancel{40}^{10}}{\cancel{4}}$ = 10

10 part = 10 × 10

= 100

⑤ A : B = 4 : 7

B = 21

7 part = 21

1 part = $\frac{\cancel{21}}{\cancel{7}}$ = 3

4 part = 12

A = 12
